

Progettazione di Applicazioni Mobili

Mobile design patterns

Forms

Stefano Burigat

Dipartimento di Scienze Matematiche, Informatiche e
Fisiche - Università di Udine

stefano.burigat@uniud.it

Forms

- Mobile applications rely extensively on forms for data entry and configuration
- Mobile forms - rendered on devices that have small screen sizes and restricted user input - give designers virtually no leeway for bad design
- Form abandonment (users who fail to complete and submit forms before giving up) is a serious and costly problem

Login (Sign In)

- Login forms should require a minimal number of inputs: username, password, command button, password help, and an option to register
- You should autofocus on the first form field, saving the user an extra tap to open the keyboard
- Don't get creative with the Login screen; use standard designs to make it easy for users to login

Login

minimal Login fields

Login

Login and Register buttons up front

Login

- Some apps use persistent Login and Register options during onboarding

Login

- Tabs are another viable option for presenting Login and Register options while keeping navigation to a minimum

Login

- Social Login through social networks is another common option

Login

- Another Login option is to forgo the username field and just require a password or PIN

Login

- Biometric-based login is another possible option to simplify access

Login

- The Login form should use the unmasked password field technique

Login

- In many cases, it's preferable to allow the user to start using the application without having to login or register

Registration (Sign Up)

- Registration forms should have a minimal number of inputs, preferably on one screen only
 - Every additional form field lowers Registration form conversion
- It is important to remove from Registration forms all those elements that do not carry important functions, such as redundant email and password fields
- All guidelines related to Registration forms are also valid for other types of input form

Registration

The image displays three mobile application registration screens, each with a red 'anti-pattern' label pointing to a specific issue.

- Screen 1 (Left):** Titled 'Create NOOK Account'. It features a list of input fields: 'First Name', 'Last Name', 'Your email address', 'Confirm email address', 'Please Choose a Password', and 'Enter Password Again'. A note '*all fields required' is present. The password field is followed by a small text prompt: '8-15 letters, numbers, or numeric symbols. No spaces.' The keyboard shown is a standard QWERTY layout.
- Screen 2 (Middle):** Shows a registration form with fields for 'Email Address' (containing 'theresaneil@gmail.com'), 'Confirm Email Address' (containing 'theresaneil@gmail.com'), 'Password' (masked with dots), and 'Confirm Password' (containing '.....U'). A 'Done' button is at the bottom right. The keyboard shown is a QWERTY layout.
- Screen 3 (Right):** Titled 'Create Account' with a 'Next' button. It shows the email 'theresa@tnid.com' and a masked password '.....'. Below the password is a 'Picture' upload icon. The names 'Theresa' and 'Neil' are displayed. A modal dialog box asks 'Does your email address look right?' with 'theresa@tnid.com' and two buttons: 'Change' and 'Looks Good!'. At the bottom, it says 'By signing in, I accept Path's Terms of Service and Privacy Policy'.

useless email and password fields; use prompts if you need to confirm data

Registration

- Use appropriate input types for fields to help people accurately enter the required type of data

Registration

- Mark optional fields (even better, remove them)

Registration

- Horizontally aligned form labels can end up truncated or simply cut into the space needed to enter the value

The image displays two screenshots of mobile application forms, each marked with a red 'X' icon in the top-left corner to indicate a design flaw.

Left Screenshot: The form is titled "Jeffrey-Spencer..." with a "Save" button. It contains several fields with horizontally aligned labels that are truncated or cut off:

- Walkthrough On Apr-5-2011** (Label is truncated)
- date Tue Apr 5/2011** (Label is truncated)
- start time 8:07 AM** (Label is truncated)
- end time ...** (Label is truncated)
- Subject** (Label is truncated, followed by a dropdown menu)
- Grade Le...** (Label is truncated, followed by a dropdown menu)
- Jeffrey-Spencer Elementary** (Label is truncated)

Right Screenshot: The form is titled "Checkout" and contains the following fields:

- First Name** Theresa
- Last Name** Neil
- Card Number**
- Expiration** (Two dropdown menus)
- CVV/CVN** (Dropdown menu)
- Billing Address**
- Street Line 1**
- Street Line 2**
- City**
- State** (Dropdown menu, showing "Alabama")
- Postal Code**

Registration

- Vertically aligned labels work best

The Twitter registration form is titled "Sign up" and includes a "Home" link. It instructs users to "Just complete the following information and you'll be ready to Tweet!". The form has three fields: "Full name" (with the hint "First and last name"), "Twitter username" (with the hint "This is how you will be known on Twitter 6-15 characters"), and "Email address" (with the hint "Where you want us to reach you").

With supporting text

The Fancy registration form is titled "Sign Up" and has a blue header. It contains three vertically aligned labels: "FIRST NAME", "LAST NAME", and "EMAIL". The input fields contain "Theresa", "Neil", and "theresaneil@gmail.com" respectively.

Sign Up

A standard mobile QWERTY keyboard is shown below the Fancy registration form.

No supporting text

The Fancy registration form is titled "FANCY" and has a dark header. It includes a "Sign Up with Email" section. The form has four fields: "Full Name" (with the hint "Your real name so friends can find you"), "Username" (with the hint "Enter your username" and a URL "Your Fancy page: http://fancy.com/Username"), "Email Address" (with the hint "Enter your email address"), and "Password" (with the hint "Create a password"). A blue "Create my account" button is at the bottom. Below the button, it says "By creating an account and signing up to Fancy, I accept the Terms of Service and Privacy Policy".

Hint text

Registration

- Hint text can replace labels but must be designed carefully:
 - it disappears once the user starts entering text
 - can be confused with an actual answer if it looks too similar to input

Registration

- With the Floating Label pattern, hint text becomes a label “floating” above the field once text is entered

The image displays two side-by-side mobile app screenshots of a 'New Post' form, illustrating the Floating Label pattern. Both screenshots show a status bar at the top with 'MDS', signal strength, '5:00 AM', and '99%' battery. The app bar contains a menu icon, the title 'New Post', and a 'Next' button. The form includes two rounded buttons for 'Location' and 'Category'. Below these are input fields for 'Title', 'Price', 'Specific Location (optional)', and 'Description'. In the left screenshot, the 'Title' field is empty. In the right screenshot, the 'Title' field contains the text 'Vintage Military Style Laptop Bag', and the hint text 'Title' has floated above it. A red circle highlights the floating label in the right screenshot.

Registration

- Offer inline feedback wherever possible and appropriate

Registration

- Show field requirements upfront

A mobile app registration form. At the top is a pink header with a back arrow, 'Sign up' text, and status bar (T-Mobile, 2:46 PM, 85% battery). Below the header is a grey circular profile picture placeholder. The form consists of four stacked input fields: 'Username', 'email' (with 'example@abc.com' as placeholder), 'password' (with 'At least 6 characters' as placeholder), and 'retype' (with 'At least 6 characters' as placeholder). At the bottom is a large green 'Done' button.

A mobile app sign-in form. At the top is a blue header with a back arrow, 'SIGN IN' text, and a close button. Below the header is the text 'Build your dreams, then eat them.' The form consists of two input fields: 'Email Address' and 'Password'. Below the password field is a reminder: 'As a reminder your password contains: at least 8 Characters | ABC | abc | 123 | !@%'. Below this is a red link 'FORGOT PASSWORD >'. At the bottom is a dark brown 'SIGN IN' button. A keyboard is visible at the bottom of the screen, showing the 'Passwords' header and a standard QWERTY layout.

Registration with Personalization

- The registration process might include a step to offer personalized content or enable social connections

Multi-step forms

- On the Web, Multi-step form processes often use process bars to show users where they are and what's next
- With their smaller screens, mobile devices just don't have the real estate to display bulky process bars
- If multiple steps are needed
 - skip the heavy process bar
 - consider displaying the current step among the total number of steps
 - minimize the number of pages and steps

Multi-step forms

The image displays three sequential screenshots of the PayPal mobile application interface for the 'Send Money' feature. Each screenshot shows a status bar at the top with a red 'X' icon, signal strength, and time (10:25 PM, 10:32 PM, and 10:25 PM respectively). The app header includes the PayPal logo and the user's balance (\$507.00 USD). The main content area shows the 'Send Money' process with options to 'Send money to', 'Bump to Send Money', or 'Send money to a recent contact'. The 'Send money to' section includes a text input for an email address and a 'Bump to Send Money' button. The 'Send money to a recent contact' section lists contacts like 'Nadav' and 'Jonmichael'. The 'Bump to Send Money' section shows a 'Bump' button and a 'Send money' button. The 'Send money to a recent contact' section shows a 'Send money' button and a 'Request money' button. The bottom of the screen features a navigation bar with icons for 'Send', 'Request', 'Account', and 'Tools'.

The image shows a screenshot of a mobile application interface for a 'SHIPPING ADDRESS' step. The top status bar displays a red 'X' icon, signal strength, and the time 4:55 PM. The app header includes a 'Back' button, the title 'SHIPPING ADDRESS', and a 'Help' button. Below the header is a progress bar with four steps: 'Step 1: Shipping Address', 'Step 2: Shipping Method', 'Step 3: Payment & Summary', and 'Step 4: Order Confirmation'. The main content area contains several text input fields for shipping information: '*First Name', '*Last Name', '*Address 1', 'Address 2', '*City', and '*Select a State'. The bottom of the screen features a navigation bar with icons for 'Home', 'Shop', 'Toolbox', 'Videos', and 'Cart', along with a right arrow icon.

avoid process bars

Multi-step forms

The image displays two mobile application screens illustrating multi-step forms.

Left Screen (Step 1/4): The header is green and reads "1/4: Select Favorite Categories". Below the header, it says "Select the categories that interest you most. This will help us recommend coupons just for you." The main content area features a grid of 12 circular icons representing different categories: Auto, Baby, Beauty, Books, Arts & Crafts, Decor, Entertainment, Electronics, Fashion, Food, Garden, and Home. The "Baby" and "Electronics" icons are highlighted in green. At the bottom, there are "Previous" and "Next" navigation buttons.

Right Screen (Step 1): The header is blue and reads "Wimberley, TX" with a date range "Sat Sep 28-Sun Sep 29". Below the header, there are two buttons: "Browse All Hotels" and "Name Your Own Price". The main content area is titled "1 Choose A Nearby City" and lists three options: "1. Kyle (10+ mi)", "2. Buda (15+ mi)", and "3. Johnson City (25+ mi)". A "View Map" link is visible next to the title. At the bottom, there is a dark bar with "1 of 3 steps" and a "Continue" button.

show the current step in the process (out of the total number)

consider using the single page approach providing details inline or in a drill-down screen

Long forms

- If your form can't fit on a single screen and it's not multi-step, using a scrolling page is preferable to a form broken up across multiple pages
- Consider a layout that does not expose input fields for non-linear input updates (e.g., editing profile information)
- Follow OS standards for placing the form completion button

Android: command button in the App Bar

Long forms

The image displays two mobile application forms side-by-side. The left form, titled 'ancestry', is a long form with multiple input fields: 'First & Middle Names', 'Surname', 'Gender' (with 'Female' selected), 'Birth' (with 'Date' and 'Optional' labels), 'Location' (with 'Optional' label), and 'Death' (with 'Date' and 'Optional' labels). It features a 'Cancel' button and a 'Next' button at the bottom. The right form, titled 'Notif', has a tabbed interface with 'DEFAULT', 'BIG TEXT', and 'BIG PICTURE' tabs. It includes fields for 'Title', 'Content', and 'Priority' (set to 'Normal'), and a checkbox for 'Ongoing notification?'. A 'CREATE' button is at the bottom. Both forms are shown on Android devices, with the status bar at the top displaying time and battery level.

Android: command button in footer

Search forms

- Some searches require multiple inputs to generate results
- Keep search forms short and simple
 - aim for a single page of criteria or less
- Use touch-optimized controls and offer reasonable defaults
- Offer the option to save the search for later

Search forms

The image displays two side-by-side real estate search forms. Both forms have a blue header bar with a back arrow, 'Map', 'For Sale', and the number of results. Below the header, there are tabs for 'Listings' and 'Map Options'. The filters are organized into sections: property status, price, beds, and baths. The right form shows a specific price range selected on the price slider.

Filter	Left Form (277 Results)	Right Form (54 Results)
Property Status	- FOR SALE (checked) - PRE-MARKET (unchecked) - RECENTLY SOLD (unchecked)	- FOR SALE (checked) - PRE-MARKET (unchecked) - RECENTLY SOLD (unchecked)
Price	Any Price	\$290K - \$600K
Beds	Any, 1+, 2+, 3+, 4+, 5+	Any, 1+, 2+, 3+, 4+, 5+
Baths	Any, 1+, 2+, 3+, 4+, 5+	Any, 1+, 2+, 3+, 4+, 5+
Buttons	See 277 Results, Reset, Save Search	See 54 Results, Reset, Save Search

save search (possibly in automatic) + preview of the number of results directly on the form

Search forms

The image displays two screenshots of a mobile application interface for flight searching.

Left Screenshot: Flight Search

- Header: Flight Search
- Form Fields:
